

As part of the Industrial Assembly Solutions Division of the Atlas Copco Group, the vision for Henrob Limited is to be perceived as the global partner for innovative joining solutions in selected customer segments and be the First in mind, First in choice for SPR technology solutions.

To this end, Henrob Limited is committed to satisfying the expectations of its customers by supplying self-piercing rivets and riveting systems that provide a highly reliable and repeatable joining process and by providing technical support and service.

The quality management system is certified to ISO/TS16949:2009 and ISO9001:2008 and conforms to the requirements of IATF16949:2016 and ISO9001:2015. The company is committed to complying with the applicable requirements of this standard, to ensure that customer specific requirements are met, therefore assuring the quality of the products and services supplied.

The effectiveness of the quality management system is reviewed regularly by the Management Team and through an internal audit programme. The outputs from these reviews and audits are used to drive improvement activities.

Quality objectives are established, progress measured and actions reviewed regularly via the company Quality Operating System (QOS).

This quality policy is communicated to all employees during the induction process and is displayed in selected locations. Any changes to the policy are communicated to all employees.

This statement is reviewed annually to ensure it continues to reflect the quality policy of the company.

Christopher Clarke  
General Manager
