

Are you interested in becoming an Innvotec Partner?

Anglo Scientific Limited, The Start Up Funding Club Limited, Oxford Innovation Opportunities Network, FinTech Circle and The Business Loan Network, the developers of ThinCats.com, are five organisations that have realised the benefits of becoming an **Innvotec** Partner.

Anglo Scientific wanted to raise a Venture Fund to complement its own activities but did not have the necessary permissions, experience or expertise to raise and manage such a Fund. The directors contacted **Innvotec** and **Innvotec** has now successfully raised a number of annual EIS Funds, the performance of which has been good. This Fund has now moved to “Evergreen” status.

The Start Up Funding Club, a firm specialising in supporting start-ups and early stage companies, was in a similar position to Anglo Scientific. It contacted **Innvotec** and the result is an ongoing relationship that has raised and manages a number of SEIS Funds. Future funds will have “Evergreen” status.

The Oxford Innvotation Opportunities Network contacted **Innvotec** to raise and manage a Fund for investment alongside their Business Angel Networks. These Funds have a regional focus. Future funds will have “Evergreen” status.

The Business Loan Network wished to increase the profile and lending capacity of its ThinCats.com “peer to peer” trading platform for loans to private companies. It contacted **Innvotec** to raise and manage a Bond that when raised would take part in auctions across the ThinCats.com trading platform. With the recent sale of The Business Loan Network, this relationship has now ceased.

Other organisations have asked the combination of Innvotec and Start Up Funding Club to “white label” their joint offering for SEIS. The first of these is FinTech Circle with whom **Innvotec** has raised an SEIS Fund dedicated to companies in the Financial Technology Sector.

Many progressive organisations such as these seek to augment their core activity with a Fund that is designed to meet specific needs, but in many cases these organisations do not possess either the necessary expertise or regulatory approvals. It is in situations like these, that **Innvotec** may be able to help.

If your organisation is professional, serious about raising a Fund or similar, confident of generating meaningful returns and is interested in becoming an **Innvotec** partner, please contact John Marsden at jmarsden@innvotec.co.uk
