## Social and Corporate Responsibility Policy Printed on recycled paper

Linney Cooper's Corporate Responsibility is to get the values and principles that govern the way we operate as individuals and as a company. It is about ensuring we sustain safe operations; have a positive impact on our people, the communities we work in and the wider environment; and build the trust and respect of our customers and stakeholders. This Policy relates to the social and non-regulatory aspects of our corporate responsibility model, i.e. conservation issues in the environment as opposed to regulations governing waste disposal. The standard expected requires the development of systems and procedures that create and deliver sustainable value in relation to the safety of operations, our impact on the environment, engagement in the community and enabling our people to excel.

This should include:

- Identification and engagement with key stakeholders and management
- Development and implementation of social and corporate strategy with clear objectives defined
- Embed the responsibilities and principles in the management processes, in particular solutions, operational processes and the supply chain
- Appointment of managers with responsibility for the development and maintenance of related systems, processes and reports
- Recording and reporting on initiatives undertaken and their impact
