RE: 2018 Executive Committee Elections

Dear SESAM members,

I write to you today to ask for your vote for the position of Vice President of the SESAM Executive Committee.

As an active simulation educator, researcher, and SESAM member for many years, I am committed to the work that we do together in the simulation community. I want to help ensure that our simulation community across Europe is vibrant and sustainable.

As your Vice President, and your representative on the Executive Committee, I will:

- Work actively and productively with our Executive Committee
- Help ensure that SESAM is on a sound financial and organisational footing for the future
- Continue to develop and deliver on our Strategic Plan
- Help expand leadership and engagement opportunities for simulation colleagues from across Europe at various stages of their careers
- Continue to develop and extend our links with national and international simulation societies
- Work to develop opportunities for collaboration on simulation research and education across Europe and beyond

The Vice President of SESAM has an important role working with the Scientific Committee to ensure that our annual meeting continues to highlight the best of simulation education and research from Europe and around the world. As an active simulation researcher, and a member of the Editorial Board for our society journal, I will help to make SESAM's annual meeting the first choice for innovative simulation experts and researchers.

We have built SESAM into a great community, and now we must work together to create a stable future. Please vote for me for Vice President of SESAM.

With best wishes,
Dr Gabriel Reedy
